

For Precast  
& Tilt-up  
Construction

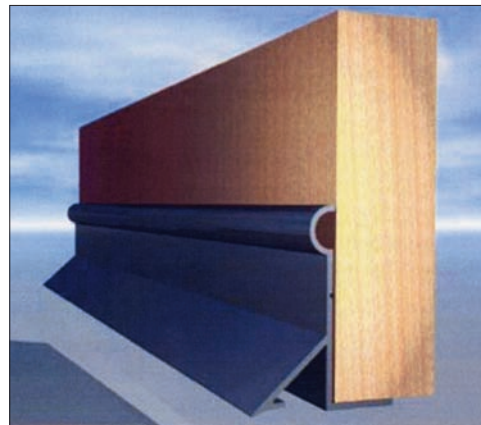

## D R I P E D G E

Victory Bear Chamfer with Drip Edge improves your finish while reducing your cost.

### Features & Benefits

The Chamfer with Drip Edge is an important part of the Victory Bear chamfer system. This nonstick PVC form provides a smooth and straight chamfer and drip edge for doors, windows, dock doors and archways. The drip edge is detachable for custom placement. You will save time and labor costs with better looking results – every time.

- **Easy Installation** – One installation forms both the chamfer and the drip edge in one easy operation.
- **Custom Drip Edge Position** – It's easy to remove the drip edge and reposition it at any specified depth.
- **Less Edge Seepage** – Reduce the cost of clean-up. The seal fits tightly, preventing concrete seepage. Minimal patching, sacking and grinding on finished surfaces.
- **No Form Release Needed** – The use of PVC eliminates pock marks, rough edges and imperfections caused by wood. Eliminates discoloring of concrete due to wood sugars.
- **Better Looking** – The use of PVC eliminates pock marks, rough edges and imperfections caused by wood. Eliminates discoloring of concrete due to wood sugars.
- **Reusable** – PVC is reusable, making your investment pay off many times.
- **Cleans Up Easily** – Victory Bear chamfers are made with PVC, an ideal material because it cleans up so easily.
