

For Precast  
& Tilt-up  
Construction

## SAW CUT COVER

Victory Bear is an innovative concrete product supplier with deep roots in the tilt-up, pre-cast, and cast-in-place industries. We offer the most complete line of tilt-up profiles in the industry.

Small changes can bring huge benefits! Victory Bear Saw Cut Cover combines rigid and flexible PVC. This combination of materials provides a **faster, easier** method for temporarily sealing and protecting saw cut joints in your slab.

### Features & Benefits

- **Save Money!** – Victory Bear's Saw Cut Cover **costs less** than many other brands.
- **The Best of Both Worlds!** – Victory Bear's combination of rigid and flexible PVC aids in function and ease of use. Its rigid structure makes it **easy to install** compared to all-flexible brands--no more fumbling with flimsy products that require expensive, unreliable machines for installation. The Saw Cut Cover's flexible fins ensure a **secure fit** in imperfect saw cuts, and a **tighter seal** against the slab than with all-rigid brands.
- **Save Time!** – The Victory Bear Saw Cut Cover's ease of use makes it a perfect **labor-saving** choice! Plus, its **unique low-profile design** leaves a much lighter impression in your tilt walls than other brands, resulting in **less patching and grinding** after the tilt!

Unique Low-Profile Design

Victory Bear's co-extruded design--a rigid skeleton with soft PVC fins--makes for a much more user-friendly, highly functional part.
