Construction

TRI - SNAP R U S T I C A T I O N

Features & Benefits

Victory Bear TRI-SNAP rustications create rustication bands (reveals) in concrete walls. The TRI-SNAP snaps open to allow nails or other fasteners to be hidden to maintain smooth, clean rustications every time. Manufactured from nonstick PVC, TRI-Snaps clean-up easily and can be reused.

- **Better Looking** – The TRI-SNAP makes fasteners virtually invisible by eliminating marks in the finish left by nail heads.
- **Less Edge Seepage** – Reduce the cost of clean-up. The rustication's specially-designed seal fits tightly against the casting surface, preventing concrete seepage.
- **Easy to Install** – Far fewer fasteners required than wood. TRI-Snaps can also be glued in place.
- **Cleans Up Easily** – Victory Bear rustications are made of PVC, an ideal material for rustications because it cleans up so easily.
- **No Form-Coat** – You save the cost and mess of form coat since PVC does not need a bond breaker.
- **Easy Storage** – Rustications are stackable for storage between jobs.

Construction

T R I - S N A P R U S T I C A T I O N

Installation

- **Step 1** – Mark a line where the rustication is to be placed
- **Step 2** – If fasteners are to be used, skip to step 3, otherwise position the TRI-SNAP in place using adhesives or tape. (see Figure 1)
- **Step 3** – Open the TRI-SNAP and position it on the surface. Install fasteners through the bottom of the TRI-SNAP and into the casting surface below. (see Figure1)
- **Step 4** – Close the TRI-SNAP and check to insure that the interlocking grips are fully engaged and the rustication is pressed firmly against the casting surface.

(No form coat or bond breaker needed)

Coefficient of Linear Expansion:
0.0132 inches per degree F

Storage: Materials should be stored out of direct sunlight to prevent long-term deterioration or color fading. Pieces can be stacked, but should be stored fully supported to keep them from warping.
