

TTF-1SM RESIDENTIAL (TRI-TECHNOLOGY FLASHING)

TTF1 Residential (Tri-Technology Flashing) is a completely new idea in flashing for masonry veneer (brick, concrete block, cast stone, natural stone, manufactured stone, glass block, structural clay tile, precast concrete, etc.). It manages wall cavity water like no other product and because it is so efficient it helps reduce the risk of mold.

Features

- Unique through wall flashing (3-part system).
- Integrated wall flashing is 12.5" high and can be expanded to meet most height requirements.
- 5-tier mortar blocker helps maintain free and clear drainage holes.
- Built-in low profile weepholes maintain proper water drainage.
- Built-in brick stops ensure proper building code airspace.
- Factory assembled corners/steps/end caps and connectors assure proper and easy installation.
- Easy snap together design saves time and money on installation.
- One piece sill pan designed for windows and doors.
