

WEATHER-TITE FLASHING

Victory Bear introduces Weather-Tite Flashing, a new moisture protection system for windows, doors, and pipe penetrations that installs in seconds!

Weather-Tite Flashing (WTF) is an effective, easy, and efficient way to seal your window and door openings. This innovative flashing product will **save you time and money** and provide greater protection against water compared to traditional flashing methods.

Features & Benefits

- **Easy Installation** – WTF is **pre-sized** to fit standard window and door depths of 4-9/16" and 6-9/16". **This eliminates the need for measuring and cutting!**
- **Economical** – WTF can **save you time and money** with ease of installation and lower material costs compared to traditional flashing methods.
- **Self-Sealing** – WTF is made from flexible plastic that creates a gasket around nail heads.
- **End Dam** – WTF's unique design includes an end dam to **block water from penetrating** into the structure.
- **One-Piece Corner** – WTF corners are made in **one piece** to effectively block water that may seep through imperfect corner joints in and around windows and doors.
