

VICTORY BEAR TRI-SNAP RUSTICATION

THE BEST GETS BETTER.

Victory Bear has redesigned its Tri-Snap Rustication! Our innovative snap closure for hiding fasteners is now easier to close than before, and the hinge has been concealed to prevent it from leaving a relief in the concrete wall. We've also added flexible fins for a greater seal—eliminating the need to caulk the edges.

FEATURES & BENEFITS

- **Unique Design** - Victory Bear's Tri-Snap Rustication features a unique snap closure—perfect for concealing fasteners. This means the only thing you see in your walls is a clean, smooth reveal, perfect for creating V-grooves in your panels.
- **Excellent Release from Concrete** - PVC does not stick to concrete, unlike wood. Victory Bear's flexible PVC edge seals help conform to surface imperfections, preventing concrete from seeping under the form.
- **Works Great with Glue** - Not using fasteners? Victory Bear's Tri-Snap can be glued in place as well!
- **Save Time and Labor Costs** - The superior finish provided by Victory Bear rustication eliminates the need for costly patching and grinding after the panels are lifted.

VICTORY BEAR QUALITY: AN OPEN AND SHUT CASE
