

ARCHITECTURAL DRIP EDGE

Victory Bear's Architectural Drip Edge is made of rigid and flexible PVC for excellent performance and value. The rigid PVC creates a superior finish, while the flexible PVC seals tightly against the form board, eliminating the need for caulking the edges. It can be mounted in any position, making it the perfect choice for doors, windows, and other openings.

FEATURES & BENEFITS

Flex-Edge Seal

Victory Bear Flex-Edge technology seals tightly against the casting surface, preventing concrete seepage while creating sharp, crisp lines.

Labor Savings

PVC provides a superior finish to wood. It releases cleanly from the concrete, and leaves no residue. The end result is a superior finish that leaves little to no finish work after the panels are lifted.

Greater Versatility

Victory Bear's Architectural Drip Edge is a single-piece design that can be installed at any desired position and depth, giving you unlimited options for your window and door openings.

ARCHITECTURAL DRIP EDGE

INSTALLATION

Simply remove the backing of the built-in adhesive tape and firmly press into place.*

**Surface must be free of dust, oil, and debris.*
