

UNIVERSAL DRIP EDGE

Victory Bear's Universal Drip Edge is made of rigid and flexible PVC for excellent performance and value. The rigid PVC creates a superior finish, while the flexible PVC seals tightly against the form board, eliminating the need for caulking the edges. It is scored for easy positioning, giving you added control and versatility when creating doors, windows, and other openings.

FEATURES & BENEFITS

Flex-Edge Seal

Victory Bear Flex-Edge technology seals tightly against the casting surface, preventing concrete seepage while creating sharp, crisp lines.

Labor Savings

PVC provides a superior finish to wood. It releases cleanly from the concrete, and leaves no residue. The end result is a superior finish that leaves little to no finish work after the panels are lifted.

Added Versatility

Victory Bear's Universal Drip Edge is scored at 1" increments, allowing you to easily adjust the depth of the drip edge from 2 to 5 inches. Its straight edge ensures level positioning.

UNIVERSAL DRIP EDGE

INSTALLATION

Step 1 - Determine the desired depth of the drip edge. If placing at a depth of less than 5" from the outside wall, cut the appropriate score line with a utility knife, then break at the score line.

Step 2 - Peel away the backing from the adhesive tape.

Step 3 - Using the bottom of the Universal Drip Edge piece as a guide against the casting surface, firmly press the adhesive into place onto the form board.

Step 4 - Set any Victory Bear chamfer into place by removing the backing from its adhesive tape and adhering it to the casting surface. Make sure there are no gaps between the Flex-Edge Seals and the contact surfaces.

Step 5 - Caulk only the ends of the Universal Drip Edge, as well as any joints. It is not necessary to caulk along the Flex-Edge Seals.

Part Number	Part Name	Pieces Per Box	Ft. Per Box	Soft PVC Seal?
710	Universal Drip Edge with Tape	24	192	YES
792	Universal Drip Edge no Tape	32	256	YES
