VICTORY BEAR HIGH DOUBLE CHAMFER

HIGH-END RESULTS WITH HIGH DOUBLE CHAMFER

Introducing Victory Bear's **#809
HIGH DOUBLE CHAMFER 2 x 3/4!**

Our High Double Chamfer was designed with ease of use and quality of finish in mind. Its labor saving features include a rigid PVC structure for superior finish to wood, flexible PVC fins to eliminate caulking, and high side walls to allow quick and easy board insertion.

MADE WITH PRIDE

IN THE USA

Rigid PVC structure provides a superior finish, while the flexible PVC seal eliminates the need for caulking.

High sides create stability, allowing easy insertion of the board while firmly holding it in place.

Unique bottom design allows the chamfered edges to seal against the slab, while providing ample surface contact area for easy glue adhesion.

Pairs perfectly with Victory Bear #806 Topside Double Chamfer.

FOR 2X DIMENSIONAL LUMBER
